Note: Each paper must have its own certificate of mailing.

AMENDMENT

Please amend the application to include Claims Nos. 1 thru 16, attached hereto, to replace Claims Nos. 1 thru 17 which were submitted with the application.

REMARKS

Concurrent with the filing of the instant PTO application, applicant filed PCT application No. PCT/USO1/40646, said PCT application presenting the identical seventeen claims as the instant PTO application.

Pursuant to the PCT application, an International Search was conducted and reported. The International Search Examiner reported that US Patents 5,844,218 *Method and System for Using an Application Programmable Smart Card for Financial Transaction in Multiple Countries* by J. C. Kawan, et al., 6,038,551 *System and Method for Configuring and Managing Resources on a Multi-Purpose Integrated Circuit Card Using a Personal Computer* by D. Barlow, et al., and 5,590,038 *Universal Electronic Card Including Receipt Storage and System and Methods of Conducting Electronic Transactions* by S. G. Pitroda make Applicant's invention non novel or not containing inventive steps.

Applicant believes that the Examiner of the instant PTO application may use the International Search Report and the references therein as a basis for rejecting the instant PTO application. Accordingly, in anticipation of said rejection, Applicant has submitted sixteen new claims, which are believed to be novel and which contain inventive steps. These sixteen claims are intended to supersede and replace the original seventeen claims in their entirety.

All three references cited by the PCT Examiner deal with smart cards, wherein all pertinent records are maintained either on the smart card or by the second party to the transaction. Thus the process and system are only useable by a single individual.

Applicant's invention on the other hand does not involve smart cards, and is useable by all subscriber cardholders from issuer organizations. Applicant's invention uses the Internet (global computer network) to connect the transacting individual via his or her personal computer to a card management system. The card management system thereafter interacts with the card issuing organization. Clearly, this is not disclosed nor suggested by the PCT International Search Report references. Thus Applicant's invention is novel and includes inventive steps.

Respectfully submitted,

Alan R. Davis
